FIRST AID

Take container, label or product name, when seeking medical attention.

If swallowed: Do not induce vomiting. Call a physician or Poison Control Centre.

If in eyes: Flush eyes with plenty of water. Get medical attention or contact a poison control centre if irritation persists.

If on skin: Wash with plenty of soap and water. Get medical attention or contact a poison control centre if irritation develops.

If inhaled: Remove individual to fresh air. If breathing difficulty occurs, get medical attention or contact a poison control centre.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

PRECAUTIONS:

Wear long pants, a long-sleeved shirt, chemical-resistant gloves and boots during mixing/loading, application, clean-up and repair activities.

Do not re-enter or allow worker entry into treated areas until 12 hours after application.

ENVIRONMENTAL PRECAUTIONS:

Do not allow waste water, effluent or runoff containing this product to enter lakes, streams, ponds or other waters.

GENERAL INFORMATION

Read all directions carefully before applying.

A-REST for Height Control of Container-Grown Lilies, Poinsettias, and Chrysanthemum A-REST is a plant growth regulator, which effectively reduces internode elongation resulting in more desirable compact plants. When used as directed, A-REST produces no phytotoxic effects.

A-REST is not a substitute for any cultural practices (lighting, watering and temperature control). Use optimum cultural practices for growing plants listed on this label.

APPLICATION DIRECTIONS

Mix A-REST with water during spray tank filling operation. Specific rates will vary with plant species, variety, timing and type of treatment, and growing conditions. The degree of response desired often varies with location and individual cultural practices. The rate of application within the recommended range depends upon the degree of growth inhibition desired by the grower and should be established by using the product on a limited basis at varying rates.

The amount of growth inhibition from A-REST treatment depends upon the total quantity of active ingredients applied per plant. Treatment techniques and equipment should ensure uniform distribution of A-REST within the treated area.

SOIL DRENCH APPLICATIONS

Chrysanthemums

Dilute the A-REST solution as indicated in Table I, and apply as a drench treatment to moisten soil. Treat plants 5 - 15 cm in height (approximately two weeks following pinch).

Lilies

Dilute the A-REST solution as indicated in Table I, and apply as a drench treatment to moisten soil. Treat plants from emergence to 30 cm in height. For optimum results, treatments should be made to plants 5 to 15 cm tall.

Poinsettias

Dilute the A-REST solution as indicated in Table I, and apply as a drench treatment to moisten soil. Treat plants at pinch to 4 weeks after pinch, or 8 to 12 weeks before finishing.

TABLE I

| No. of 15-cm Pots to be Treated | Drench Volume (mL) | Dilution Ratio A-REST to Water | Rate (mg/15-cm Pot) | Final Drench Concentration (mg/L) |
|---------------------------------|--------------------|--------------------------------|---------------------|-----------------------------------|
| 250 | 120 | 250 mL 29.75 L | 0.25 | 2 |
| 250 | 60 | 250 mL 14.75 L | 0.25 | 4 |
| 250 | 60 | 500 mL 14.5 L | 0.50 | 8 |
| 250 | 120 | 500 mL 29.5 L | 0.50 | 4 |

WARNING

Do not add any additional wetting agents to A-REST solutions. Plants treated with A-REST may require less water than untreated plants. Over-application or uneven application of A-REST will result in excessive or irregular growth control. A slight delay (two to five days) in flower development may occur at the higher recommended treatment levels.

DO NOT FREEZE

DISPOSAL

For Disposable containers

Do not reuse this container for any purpose. Disposal must be in accordance with the container disposal agreement entered into at the time of import for own use certificate application. Please ensure the following:

1. Remove the cap and paper brochure or leaflet.
2. Triple- or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank.
3. Make the empty, rinsed container unsuitable for further use.

For Returnable Containers

Do not reuse this container for any purpose. For disposal, this empty container must be returned to the location designated at the time of import for own use certificate application.

Disposal of Unused Product

Importers are responsible for the proper disposal of unwanted product. Currently unwanted product must be disposed of at the importer's expense in accordance with provincial requirements. Contact your provincial authority for more information.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
