

Invites you to a Seminar by:

Dr. David Teulon, Plant and Food Research, New Zealand

The lure of scent: Alleochemicals for thrips pest management

Monday, February 8, 2010

11:00a.m

Rittenhouse Hall

Ontario Government Building

4890 Victoria Avenue North

Vineland Station, Ontario

Directions: Exit 57 from QEW and go North on Victoria Avenue. Enter first driveway on the left, just past the North Service Road. Over the stone bridge, Rittenhouse Hall is the first red brick building.

Dr David Teulon is currently Portfolio Manager Bioprotection for the newly formed NZ Institute of Plant and Food Research at Lincoln, New Zealand, where he has been based for the last 14 years. He has postgraduate degrees in horticulture and entomology from Lincoln University and has worked at research institutes in the Netherlands, USA and Germany. David is also an Honorary Research Associate at the Advanced Centre for Bioprotection at Lincoln University. He has a broad experience in plant protection and biosecurity having worked in fruit, vegetable and arable crops and forest systems. He is recognised as a world authority on thrips (a small insect pest). A patented product from his research team was recently commercialised in Europe where it won an international environmental award.
