SUPERVISOR TRAINING FOR AGRICULTURE, HORTICULTURE & LANDSCAPING INDUSTRIES

Your supervisors are the key to getting the job done right and safely. With both agriculture and landscaping industries under the Occupational Health & Safety Act (OHSA) now, you need to ensure that your supervisors are competent people.

This Farm Safety seminar will introduce supervisors to their core responsibilities under the OHSA. It will also cover communications skills and training methods on how to instruct workers. The supervisor

will also need to understand accident investigation techniques, hazard identification and controls and emergency procedures. They will learn the need for written records for due diligence and how to document safety issues.

Along with well trained workers, they will be the eyes and ears of your safety program. The front line supervisor is a key element in your health and safety program. Give them the tools to do the job and to be a competent worker.

April 23rd, 2009
10:00 am - 3:00 pm

@

University of Guelph
Vineland Campus
Rittenhouse Hall
4890 Victoria Avenue
Vineland, Ontario

**PLEASE
